### **Webinar on “Evolution from offline to online teaching”**

“The Pandemic has changed the education sector; it has pushed optimization in delivery methods. Schools and education institutions have been forced to move online. A new normal has been created and it is teaching online. While a lot of institutions have moved online by buying licenses for video conferencing tools, the question is, have they moved online? If offline traditional methods of teaching are applied online, they can jeopardize (or limit) the success of the training.

Various issues come in when moving offline to online learning, how does one provides informal social interactions, how to ensure student attention, or even how to ensure active participation? Most schools or other institutions struggle with these since neither their teaching material addresses this nor have they had training on this. Major issues : If one sees the impact of Covid-19 globally, at its peak 95 per cent learners were affected with over 1 billion learners affected in absolute terms. This ensured that learners moved from offline methods of delivery to online and, more so the shift was quick.”

There was 5 Days F.D.P. Webinar from 30<sup>th</sup> May 2020 to 3<sup>rd</sup> June 2020 from Internal quality assurance cell and faculty development committee in association with department of information and technology of Mumbai Regional center and Microsoft has organized F.D.A. on “**Evolution from Offline to Online teaching**”. There was on this occasion various resource person they has given lecture on technology which is useful in online teaching at the end of program all students delivered vote of thanks and program completed accordingly. This webinar was taken on Zoom meet and there were 75 participants joint the meeting.
